

CITY OF BUELLTON NOTICE OF CHANGES TO WATER AND WASTEWATER RATES

On September 22, 2016, Water and Sewer Rates increased per Resolution No. 16-19. The first rate increase occurred on November 1, 2016, the second occurred on November 1, 2017, and the **third increase will become effective on July 1, 2018.**

REASON FOR THE RATE INCREASE The City is dedicated to providing reliable water and wastewater services cost-effectively while protecting the water resources and the public health of our community. While the City continually strives for cost reductions and better utilization of the public's assets entrusted to us, we still must align rates with the increasing costs to deliver services, including, among others, the cost to comply with regulations governing the treatment of water and wastewater, the disposal of wastewater, and the maintenance of vital infrastructure. The City's operational costs for both water and wastewater have not been sustained through the existing rate structure and have required transfer from those fund reserves, creating continued deficit. The water and wastewater funds should be self-sustaining.

WATER RATE INCREASE - JULY 1, 2018:

Meter Size	Fixed Monthly Service Charges FY 2018-2019
5/8" and 3/4"	\$ 35.51
1"	\$ 96.89
