

NO!
NEVER pour or wash anything into a storm drain.

CLEANING UP?

NOTHING BUT RAIN DOWN THE STORM DRAIN.

YES!
Dispose of mop water in a utility sink that is properly connected to the sanitary sewer.

STORMWATER RUNOFF IS NOT TREATED and is the leading source of water pollution in our community. Runoff flows directly from the storm drain into local waterways.

Many business activities contribute to stormwater pollution. **YOU** can help keep pollutants out of our waterways and reduce the hazards to people and fish.

Remember—nothing but rain down the storm drain.
